## Work Completed:

- Tuesday:
  - Business mentor meeting, discussing our product and plans for marketing
  - Group meeting afterwards assigning any new tasks and working on the parser and validator, finishing it off.
  - Helped out other group members to finish contracts and solve any problems, including working on the test harnesses for the text and graphics libraries
- Friday:
  - Meeting to assign tasks and check progress
  - Handover of contracts to Group 2. BookCook. For the text and graphics libraries
  - Meeting to discuss the design and functionality of our product and how each individual slide will work in the application. Included making a couple of rough mockups and agreeing on UI design choices such as menu buttons or drop down bars, and how the pages interact with each other.
- Saturday:
  - Worked on the parser and completed it to store the data in a hashtable, and then return the data out of the parser library. The parser now can read through all items contained within the PWS schema, and validate against them.
  - Started playing around with the main application and attempted to work out a suitable package and class structure for a modular design
